DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In a utility claim either an apparatus or a method must be claimed. It is unclear from the preamble of independent claims what is being claimed. The preamble should clearly recite "a board game apparatus" or "a method of playing a board game comprising the steps of".

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferguson.

Ferguson teaches a board game having a path, spaces (Fig.1), center stage (36), cards (Fig.5), play piece (Fig.4), dice (Fig.3), further collecting cards and reaching the stage (col.3, lines 4-14) to win the game.

Claim Rejections - 35 USC § 103

4. Claims 1-10 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gorski in view of Ferguson and Delessio.

Art Unit: 3711

Gorski teaches a board game and method of playing a board game having playing path (74) and spaces with indicia (122), sets of cards (Fig.14,15), board having a central finishing space (38), the object of the game being reaching the central space along with a number of scoring markers (col.2, lines 10-15). Gorski teaches all limitations except that it does not teach play money and play path branching one from another. Ferguson teaches multiple path branching from each other (Fig.1). In order to make the game interesting, it would have been obvious to change the path on the board. One of ordinary skill in art at the time the invention was made would have multiple paths on the board. Gorski teaches all limitations of these claims except that it does not teach money. DeLessio teaches a similar game having to use fake money. In order to make the game further interesting, it would have been obvious to add such commonly used items as used by Delessio. One of ordinary skill in art at the time the invention was made would have used fake money to make the game further interesting to players.
